# The 9<sup>th</sup> Congress of the Lebanese Urology Society **Program**

---

Dear Participants,

On behalf of the Lebanese Urology Society, I would like to welcome our guests and members to the **"9<sup>th</sup> Congress of the Lebanese Urology Society"**

Organized in collaboration with the "Association Francaise d'Urologie (AFU)" and the European Association of Urology (EAU), the congress will host several well known international and national speakers that will update us and share their experience on various urologic subjects. On top of didactic lectures round table interactive discussions are organized .

Moreover and over the three days of the congress and for the first time in the lebanese congress "Hands-on workshops" are available through registration on site.

As we are great believers in multidisciplinary approach in medicine and urology in particular, we will introduce NGO's working in healthcare and looking at nursing approach to some urologic problems.

An exceptional opening ceremony will witness the launching of the Uro-Oncology research program in collaboration with the "Intergroupe Coopérateur Francophone de recherche en onco-urologie (ICFUro)".

Looking forward to seeing you there.

**Raghid El Khoury , MD**

President, Lebanese Urology Society
